Addition information, anything to help with executing or grading of the current milestone
Please explain what is working for your prototype and what can be tested. Also, what search terms to use.
Please make sure to explain how to use certain pieces of the log in information. Especially if its more than a simple SSH command.
If your server requires a Key please make sure to include it with the submission of the document, regardless if it was submitted with prior milestones. If you are worried about sending keys through emails, you can use links to google drive or dropbox etc. Once key has been retrieved you can delete the link.
